Forecast for Monday 11 Jan 2021

Weather: A few clear spells across eastern parts through the early hours but generally cloudy in west with patchy mainly light rain and summit sleet or snow. Becoming cloudier through the morning with outbreaks of rain developing more widely becoming persistent and occasionally heavy, especially in west through the evening. During the evening the rain on the highest summits is expected to turn increasingly to snow.

Chance of cloud free mountain/hill tops above 800m: Around 60% at first falling to 25% in east, otherwise little chance.

Visibility: Persistent low cloud above 450-600m, but cloud more broken above 750m across eastern hills at times, especially through the morning. Risk of blizzard conditions on highest summits towards midnight. Below the cloud visibility hazy becoming just a few kilometres in heavier rain.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Gusts around 60mph over ridges and summits.

Forecast for Tuesday 12 Jan 2021

Weather: Outbreaks of rain, sleet and, increasingly above 600m, snow clearing around or soon after dawn. Then a dry day with almost unbroken sunshine developing. Cloud, above the summits, increasing through the evening with outbreaks of rain, with some snow for a time above 750m by late evening.

Maximum wind: westerly 25-30mph, gusts around 50mph over ridges and summits, through the early hours, turning northerly or northwesterly 15-20mph around dawn then becoming Variable 10 mph or less by mid-afternoon.

Chance of cloud free mountain/hill tops above 800m: Little chance through the early hours becoming 100% around or soon after dawn, with cloud lifting and breaking to leave little or no cloud below the summits.

Visibility: Periods or persistent cloud above 450m in west and 600m in east clearing around or soon after dawn. Visibility through the day very good with some good panoramic views of freshly snow covered summits.

Temperature: **Valleys:** Around plus 3 or 4 Celsius at dawn rising to plus 5 or 6 Celsius by day.
At 800m: Around plus 3 Celsius falling soon after dawn to minus 1 Celsius, then rising in evening
Freezing level: 1000m, falling to 600m around or soon after, rising again later.
